14. Considering your tax bracket, do you prefer to use tax-exempt fixed income investments, even though tax-exempt investments may provide a lower current yield than equivalent taxable investments?

Yes

No

Score and Investment Objective

Use the following calculation to determine your point score and identify the appropriate strategy listed below.

A. Add your points for questions 1–2. _____

B. Add your points for questions 3–13. _____

C. Subtract B from A. _____ (total points)

Points: Investment Objective Asset Class Mix

0–9 Income with Limited Growth: 80% Fixed Income; 20% Equity

10–19 Income with Moderate Growth: 60% Fixed Income; 40% Equity

20–49 Growth and Income: 40% Fixed Income; 60% Equity

50–69 Primarily Growth*: 20% Fixed Income; 80% Equity

70+ Growth: 98% Equity; 2% Cash

Given your specific circumstances, if you believe that any of these objectives will be more suitable than the objective specified by the worksheet, your advisor will discuss the alternatives and make an appropriate recommendation.

**If your score points you to the Primarily Growth investment objective, consider the Growth investment objective if the amount that you are investing for this goal represents only the aggressive portion of your total portfolio and if you already own more conservative investments—such as fixed income and short-term securities—that can provide a balance to the short-term fluctuations of stocks.*
